

NAVIGATOR STAIR LIFTS

Stepping up your Confidence and Independence

Navigator is a leading manufacturer of lifts and is inspired by those who are mobility challenged. Navigator is driven to create mobility and accessibility products that help or enable people to go where they want, when they want, how they want.

Founded in 1998, Navigator has a proud history of growth by evolving our product lines to enrich the lives of our customers. We give people the path to independence to remain in their home, enjoy their families, and be engaged in their communities. Through innovation we are committed to help people of all ages overcome their limited physical mobility at home and away. All Navigator lifts are assembled in the USA, which means quality you can depend on.

Be Independent. Be Confident. Be Informed.

19 million people in the U.S. have disabilities that create problems walking, climbing or descending stairs; making it more difficult to stay in the home they love. Homes that are so often our foundation; where good times are had and memories are created.

Compounding this challenge - according to U.S. Department of Housing and Urban Development, 65% of single family/attached homes in the U.S. have 2 levels or more. When you couple those statistics with those from U.S. Centers for Disease Control and Prevention – that every 11 seconds, an older adult is treated in the emergency room for a fall, modifying your home becomes a real consideration.

Don't let your staircase become an obstacle to your quality of life.

Peace of Mind Benefits Only with Navigator

There are many stair lifts to choose from in the marketplace. So what makes the Navigator different and contributes to its lower cost of ownership?

- Zero Maintenance and lower energy bills from a low friction system
- Efficient motor that gives extended performance during power loss
- Helical Worm Gear and Nylon Polymer Gear Rack for a smooth ride and greater stability
- Folding Rail Design
- Compact

Navigator provides a range of weight capacities, sizes, and advanced features to meet your unique needs.

Oversized Helical Worm Gear with six points of contact for an energy efficient low friction design. That means a smooth and stable ride.

Nylon Polymer Gear Rack with steel reinforcement. Lubrication free. That means durability and ZERO maintenance.

The Navigator is the world's most compact stair lift, folding closer to the wall. That means others can pass by easily and more room for you.

Navigator Folding Rail Eliminates Trip Hazards

The Navigator Folding Rail deploys automatically to keep walkways clear. This exclusive Navigator design option eliminates the need to stop and push a button or leave the seat. And its simple mechanical design makes it reliable and minimizes system failures. The folding rail option is only compatible with the NAV 3350 model.

All Navigator Stair Lifts come with two remotes so you may operate your chair without sitting on it, or a second user can call the chair if required.

What to Look for When Purchasing

Many stair lifts on the market have 265 lbs - 300 lbs capacity. While that may be enough for some, there may be need for greater range. More than one family member may need to use the lift.

If these concerns are weighing on you, consider Navigator's NAV 3350 and NAV 3600. These lifts boast a 350 lb or 600 lb weight capacity respectively - for peace of mind knowing your lift is capable to handle your needs.

ZERO MAINTENANCE

For most people that require a stair lift, performing regular maintenance on their lift is a challenge. Navigator is the only stair lift on the market that does not require lubrication due to its nylon polymer gear rack and worm gear. No mess, no fuss, and no expensive service contracts.

RAIL SIZE & MOUNTING

Navigator's rail is best in class and sits just 3.5" - 5.5" high. The most compact stair lift on the market, Navigator has a folded width of just at 10.5", mounting as close as 0.5" from the wall, allowing for others to easily pass by.

The Navigator Advantage

INDEPENDENT

CONFIDENT

INFORMED

The Navigator stair lift gives you the freedom to go up and down the stairs with confidence. It gives Independence. It gives Peace of Mind. The Navigator isn't just a stair lift, it's a quality of life. For those who own it and their families.

The Navigator Straight Stair Lift, made with you in mind.

Every year, nearly 100,000 people make the decision to invest in a stair lift. Our family was one of them. We wanted the same easy access for our son that other families have without thinking of it.
