

ENJOY THE  
BEAUTY OF A NEW  
BATHROOM WITHOUT  
THE HASSLES OF  
REMODELING

*There is a Difference*

# Discover the Beauty and Simplicity of acrylic bathtub and shower systems

Updating your bathroom should not be expensive, messy, or difficult. With acrylic bathtub and shower systems, you won't drain your bank account to improve the smallest room in the house. Best of all, we deliver beautiful, custom solutions quickly and easily.

## Before

In just one day your bathroom is complete and ready to use. Installation of our custom fitted acrylic systems is clean and simple.

After the dust settles, ceramic tile, marble, granite, and fiberglass show their disadvantages. Acrylic stays beautiful for years to come.

### CERAMIC TILE

a standard in bathrooms for generations, has a porous surface that allows for mold and mildew making it hard to clean. Over time grout deteriorates increasing the risk of leakage. Tile that is in-style when installed may quickly become outdated.

### MARBLE AND GRANITE

look luxurious and have a price tag to match. In addition, their beauty is fragile because they stain very easily and require careful maintenance. These surfaces also feature grout that deteriorates with age, causing leaks and rot.

### FIBERGLASS

one-piece surround systems have a short life span. Because they are not custom manufactured, stock sizes do not fit all bathrooms. In addition, mold and mildew can be problems because of the porous material.

THERE IS A BETTER CHOICE.

ACRYLIC BATH  
SYSTEMS FROM  
LINERS DIRECT  
ARE THE IDEAL  
SOLUTION

**Durable material**

- Acrylic is tough and will not chip or crack
- Acrylic is UV-stable and will not fade
- Exclusive protection resists mildew and bacteria growth

**Practical features**

- No tear-out or mess
- Installs directly over tub and walls
- Installation takes one day so you can use your tub/shower the next day
- Acrylic is non-porous so it's easier to clean and maintain
- Baths are warmer because acrylic retains heat 30% longer

**Affordable price**

- Save thousands over a traditional remodeling project
- Remodeling your bathroom improves the value of your home

**Beautiful results**

- Styles and colors to complement every home
- Maintains a "new" appearance with minimal care

Our products maximize  
practicality without  
sacrificing beauty

Acrylic bath systems have been installed for over 25 years and are one of the fastest growing segments of the home remodeling industry.

# A Fast and Clean way to remodel bathrooms without compromising aesthetics.

## **NOW WITH SILVER SHIELD®**

*Our bath and shower systems offer you the added exclusive protection of SILVER SHIELD. Infused into our products for the lifetime of your Bathwraps system, the silver ions in SILVER SHIELD attack microbe cells to prevent bacteria from growing and reproducing.*

**SILVER SHIELD:** the antimicrobial protection that never stops protecting®

Silver Shield's silver ion technology is similar to that found in many Food and Drug Administration (FDA) cleared products. Be aware of competing products that claim anti-microbial protection but may include a pesticide currently under investigation by the FDA for safety concerns.

## QUALITY INSTALLATION WITH OUR PROPRIETARY TECHNIQUE AND FULL WARRANTY

Our installation training program is directed by a 25-year industry professional who invented the standard tools used by most in the industry. Contractors carefully follow detailed guidelines to ensure the highest quality results. We are so confident that we stand behind our products with a lifetime warranty.

- All original surfaces are prepared, cleaned and primed for a permanent adhesion to the foundation.
- Permanently flexible butyl tape and silicone adhesives allow the acrylic system to expand and contract with seasonal temperature changes.
- Our thermo-formed drain relieves stress and prevents leaks.
- Factory-certified fusion installation, with triple-lock seals in all corners, creates a permanently watertight system.
- Sanitary-grade silicone contains an anti-microbial that helps prevent the growth of mold and mildew.
- Acrylic is non-porous so bacteria cannot grow; and it is UV-stable, making it permanently color-fast.

## THINK GREEN

Initially, acrylic bath systems were created for the hotel industry as a simple way to update bathrooms without the mess of tearing out old fixtures. The existing tub, shower and walls are covered with a new, custom fitted, durable facing. By installing over the old fixtures, the acrylic material has a strong, solid base. By lining your tub or shower with acrylic bathtub and shower systems, you are sending less waste to landfills.

Acrylic tubs keep bath water warmer 30% longer.

We have a tub for any style

BORNEO

CASCADE

BENTLEY

EMPRESS

BARBADOS

ARUBA

## A WHOLE NEW TUB

If your circumstances require a replacement bathtub then our Aruba, 5-foot stand-alone soaker tub will provide a spa-like experience. This sturdy tub is a generous 20 inches deep and allows almost anyone the option of full body bathing. Another option in our bathtub line is the 19" Barbados soaker tub which comes with built-in arm rests for added comfort.

# Complete your bathroom makeover with a custom wall treatment

Like our tubliners, our acrylic wall systems are non-porous, easy to maintain, and will look brand new with minimal care. All walls are custom fit on location so that you're assured an exact fit. Our variety of colors and finishes allow you to create a bathroom that matches your decor.

## CUSTOM SHOWERS

# Showers that fit any need and every lifestyle

### SHOWER REPLACEMENTS

Whether your shower has a lip or not, we will custom fit your existing shower with a whole new look. Our customized shower work is the best in the industry, and we frequently work with contractors and architects to create solutions that meet their exact specifications. The result is a new shower that is beautiful and easy to maintain.

### TUB TO SHOWER CONVERSIONS

We offer a wide variety of custom and standard sizes to easily convert a bathtub into a huge low-threshold, step-in shower or barrier-free pan. We remove the tub and fit the new shower unit into the same space.

BEFORE

AFTER

45% of all household accidents resulting in serious injuries take place in the bathroom. Converting a tub to shower can reduce the risk of injury for senior citizens.

Our Built-In Seated Shower is a great enhancement to any bathroom. This seat offers ADA compliant features like a sturdy, slip-resistant seat.

Our Barrier-Free replacement shower pan has an almost floor level threshold which makes stepping into and out of the shower easy and safe.

### BENCH SEAT

We also offer a bench seat which features added comfort, safety and security for members of all ages in your home. Available in a wide variety of seat and wrap colors.

Neo-Angle

We custom manufacture your shower floor or pan replacement to match the size of your existing opening.

## WALK-IN BATHTUBS
