

A walk-in tub provides independence for seniors who value self-sufficiency and for those with limited mobility. The Designed for Seniors® Walk-In Tub gives you the ultimate in bathing comfort and safety.

Your Designed for Seniors® Walk-In Tub includes:

1 Hydro & Air Therapy

Featuring the patented Jacuzzi® PointPro™ jet system. A unique network of adjustable water jets and gentle air massagers.

2 Built-In Safety

Low entry way for safe entry and exit. Non-skid floor surface and side grab bar for added safety and support. Protection from extreme water temperature with anti-scald water valves.

3 Aroma & Chroma Therapy

Allow calming fragrance to transform your bath into a spa-like experience. Gentle LED lighting enhances moods and promotes relaxation.

4 Built-In Comfort

Sit back and relax on our ADA-compliant contoured seat design. Inline heater maintains desired water temperature throughout your bath experience.

Jacuzzi Walk-In Bathtubs

Enjoy a soothing and therapeutic bath safely and independently

Designed for Seniors Walk-In Tubs not only provide a safe and enjoyable way to take a bath, but also provide a number of health benefits that can greatly improve your quality of life. The air and water jets of these tubs have been proven to help ease the symptoms of arthritis, back problems, circulatory diseases, diabetes, muscle cramps, osteoarthritis, weakness and various injuries. Designed for Seniors Walk-In Tubs feel more like a spa than a simple bathtub. You'll have the independence and worry-free ability to enjoy bathing again safely.

Hydrotherapy health benefits

The adjustable back jets and hydro massage system of Designed for Seniors Walk-In Tub help to ease back pain and increase flexibility in your major muscles. The air massage system provides the therapy of thousands of tiny massages all over your body with the perfect pre-heated temperature to gently ease pain from your feet to your neck. In addition to the benefits of relaxation and pain relief, the movements also ease inflammation while boosting blood circulation and strengthening your immune system.

In addition, being engulfed in warm water can:

- Increase circulation
- Open up small blood vessels close to the tissues
- Reduce aches and pains
- Speed tissue healing by oxygenating and removing harmful toxins
- Strengthen the immune system
- Boost beneficial hormone production

- Anti-scald valves
- Aromatherapy
- Air Therapy
- Chromatherapy
- Hydrotherapy
- White or Almond
- High gloss stain resistant Acrylic surface
- Limited Lifetime Warranty
- Nationwide Service Network

How it all began...

In 1956, the Jacuzzi brothers responded to a family member's need for pain-relieving hydrotherapy.

Their ingenuity and knowledge of hydraulics led to the creation of a portable hydrotherapy pump. The J-300 would turn any normal bathtub into a relaxing, rejuvenating hydrotherapeutic spa. Jacuzzi quickly became a household name; known to this day for quality products and reliable pain relief.

Your own personal spa...

No other Walk-In Tub features the patented Jacuzzi® PointPro™ jet system. These high-volume, low-pressure pumps feature a perfectly balanced water-to-air ratio to massage thoroughly yet gently. They are all arranged in precise locations designed to deliver a therapeutic massage, yet they are fully adjustable so that your bathing experience can be completely unique.

American made...

Designed for Seniors Walk-In Tubs are proud to be made in America, featuring our remarkable limited lifetime warranty supported by a nationwide service network.

Designed to be easily installed in your existing tub space.
